## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 6, 14, and 23-31 are allowed.
2. The following is an Examiner's statement of reasons for allowance: Claims 1, 6, 14, and 23-31 are allowable in light of the amendments to the claims and Applicant's persuasive arguments. Prior art was not found which either anticipates or makes obvious Applicant's claimed invention. Specifically, the prior art fails to disclose an observability buffer having a trigger, wherein the observability buffer is integrated on a first component, and wherein the observability buffer is configured to un-intrusively observe and echo one or more of a plurality of signals transmitted between the first component and the second component based on one or more of a control signal-based indication, an address signal-based indication, and a time-based indication, and an observability port integrated on the first component, in combination with the other limitations of the claims and taken as a whole. Claims 1, 6, and 14 recite limitations which are substantially equivalent.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
